TAWI ergonomic lifting equipment

Swedish quality. Global solutions.

Ergonomics is about adjusting work and work environments to the needs of the employees. It's about planning and organizing work in a way that contributes to healthy employees and minimizes the risk of injuries and long term health challenges. Good ergonomics is an effective way of making your business more productive and profitable.

TAWI lifting equipment has been facilitating ergonomic material handling for decades, and by customizing our solutions to your specific needs we can guarantee that they will help lift your business.

Increase efficiency and ergonomics with TAWI VacuEasylift

TAWI VacuEasylift is a leading manual vacuum lifter that will lift, lower, move and turn most types of goods in all possible environments and working conditions.

Protect your employees

Goods are easily picked up with no physical effort for the operator.

Handling difficult and heavy goods such as these large wooden panels is easy with TAWI VacuEasylift.

No heavy lifting and no uncomfortable strain on the body means no more aching shoulders, backs and knees.

Boost efficiency and lower the costs

Using TAWI lifters means that large and heavy goods can be handled by one single person, saving valuable time and resources for your business.

The challenge of increasing productivity and ergonomics at the same time is increasingly important for more and more companies.

Our focus is to help you achieve this.

Anyone can lift

Versatile and flexible

^{TAWI} VacuEasylift lifts just about anything. Choose between 12 models for lifting sacks, boxes, sheets, panels, crates, bales, drums and much more, up to 270 kg.

A wide selection of handles and suction feet helps customize the lifter to meet your needs. Lift from the top, from the side, or whatever suits your needs.

Safe and reliable

Lifting should be easy and safe in all possible working conditions, for both the operator and the product.

^{TAWI} VacuEasylift is a safe and reliable tool commonly used in manufacturing and mechanical processing, warehouses and distribution terminals. The tool can be adapted for ATEX-regulated facilities. Stainless steel models, ideal for industries with high sanitary requirements, are available on request.

just about anything

Ergonomic

Extremely smooth and quick operation is accomplished by using the same handle to lift, lower and release the load, and by using the vacuum to hold and lift the load.

^{TAWI} VacuEasylift lets anyone handle goods in all sizes, up to 270 kg, with practically no effort at all.

Efficient

A two-man job can often be carried out by one operator with ^{TAWI} VacuEasylift. The lifting system is simple to adjust to suit loads and requirements of most industries.

With a TAWI solution for your lifting needs, you achieve a powerful combination of efficiency, ergonomics and economy that will boost your business. An efficient solution, including everything you need to optimise your manual handling of goods.

TAWI VacuEasylift standard models

Model*	VM30 [VM100]	VM40 [VM120]	VM50 [VM140]	VM60 [VM160]

* All TAWI vacuum lifters have new model names from March 2018, old names in brackets for reference

VM30-VM120 are available in stainless steel, ideal for industries with high sanitary requirements. VM180 and VM270 are available in stainless steel with standard hose.

We recommend mounting your TAWI VacuEasylift in our own range of Crane Systems. The jib arm or bridge crane suspends the lift tube and is available in different lengths and capacities.

Contact your TAWI representative for more information about our overhead crane systems and jib cranes.

Vacuum pumps

Our vacuum pumps are designed with three key features in mind; performance, reliability and sustainability. The direct driven pump minimizes friction and unnecessary wear, ensuring continuous operations for your vacuum lifters.

TAWI vacuum pumps are available in two models; medium and large. The medium model is recommended for VM30-50, the large model for VM60-270.

Handles

Fixed handle

Standard handle

Flex handle

Special handle
